

VULNERABLE AREAS

Apply Step **One** to your forearms, lower legs, and neck. These areas receive the highest carcinogen exposure.

FOREARM

LOWER LEG

NECK

APPLICATION TIPS

Apply **StepOne** first-thing at the beginning of your shift. Reapply promptly following dermal decon (using skin wipes or taking a shower).

For best results...

- Hold the can 4–6 inches from your skin, spray on like sunscreen, and then spread evenly with your hand.
- ***Stop spreading*** once an even coat is formed. **StepOne** dries in about 30 seconds and fully sets within 5 minutes for maximum abrasion resistance.
- If applying after a shower, towel off before applying. Your skin can be damp but not wet.
- Do not use lotion or sunscreen within 15 minutes prior to applying **StepOne**.
- **StepOne** can be removed using soap and water.
